

# TrapEase® FASCIA

## COLOR MATCHED FASCIA FASTENER

### FEATURES

- Engineered for fascia expansion and contraction
- Head painted to color match fascia board
- Strip-out resistant #20 TORX® Ttap® drive system
- Corrosion and fade resistant

**LENGTHS** 1 3/4"

### PACKAGING QUANTITIES

100 LF kit complete with 200 screws,  
1 counterbore tool, and 1 driver bit

### DESCRIPTION

The TrapEase Fascia System is the strongest, fastest way to attach your composite fascia. TrapEase Fascia has been designed to allow for Fascia board expansion and contraction, delivering a long lasting, beautiful finished look. Each 100 LF kit contains a counterbore bit that drills a perfect pilot hole and recess for the color matched fastener head to sit flush when installed.

TrapEase Fascia comes in 18 different colors, ensuring a perfect match to your next decking project.

## INSTALLATION PROCEDURE

It is recommended to use an 18V or greater cordless drill for all parts of this installation.

An impact driver is not recommended.

### Fastening Pattern

1. For 1x8" fascia, install a vertical row of 2 fasteners every 18". Use 3 fasteners for 1x12" fascia.
2. Install the first and last row 1" from board ends and edges.
3. Always refer to fascia board manufacturer installation instructions prior to installation.

## INSTALLATION INSTRUCTION

1. Tack the fascia board in place using a few Fascia screws. Leave the heads slightly raised.
2. With fascia in place, drill the recommended fastening pattern using the Counterbore Tool.
3. Install screws into each prepared hole using the driver bit. Drive in one continuous motion until fastener is seated, keeping the fastener perpendicular to fascia for best finished look. Caution: it is important to not overdrive the screws. A torque setting on your drill can be used to speed up installation.
4. Remove the tacking screws, counterbore the resulting hole, and fasten with fascia screws to finish the job.

## CORROSION RESISTANCE

The fastener has been tested and is approved for use in pressure treated lumber such as ACQ. The product is not approved for use where framing is in direct contact with salt water. Please contact FastenMaster for a recommended fastener in this application.

TrapEase FASCIA Selection Guide			
SCREW LENGTH	PACKAGING QTY	COVERAGE	SKU
1- 3/4"	200 Screws, 1 Counterbore Tool, 1 Driver Bit	100 LF	FMTRF-1LF**

### \*\*Selecting SKU/Board Color

When ordering, please combine SKU column with board manufacturer color key below.

**Example:** Fire Pit, 100LF for Fire Pit = *FMTRF-1LFFP*

*New board colors are always being added to the TrapEase FASCIA product line. If the board color you are looking for is not listed on this page, consult our website for recent updates or call FastenMaster customer service.*

### Color Matching

FastenMaster has a color match for all leading deck board brands.
